

*Traditions*  
WINDOWS FROM NT WINDOW®

Traditions is available from a select group of Authorized NT Window Dealers who meet the following qualifications:

## Embrace the Elements.

While reading this brochure you will notice a few symbols like these below throughout the text. We know how overwhelming the product review process can be and seek to make things a little bit easier by identifying key benefits you can expect from purchasing and installing Traditions Window & Door products in your home.

**Beauty** – This symbol identifies the attributes of Traditions Window and Door products that enhance the look of your home from the curb and from inside your home. We make it easy to find the styles and options that fit your home's design and decor.

**Comfort** – This symbol identifies key features that maximize your potential for increased comfort and peace of mind. You'll find this symbol highlighting product, service and even installation features – all items which can lead to a positive swing in your level of comfort in your home.

**Simple & Green** – This symbol identifies the simple benefits of the select features of Traditions Windows and Doors. It is also used to clearly show the Green benefits of the window and door products you're considering installing in your home. We'll highlight simple yet high performing features and options that make a big impact on energy use and the environment.

**Value** – This symbol identifies the standard features included in the design of Traditions Windows and Doors that typically come at a premium in competing brands. The Value symbol is used to alert you of an outstanding feature included that might otherwise be overlooked. Value features definitely give you the biggest bang for your buck.

# Remarkable Performance.

## Installation is Key. Traditions Delivers.

Let's face it, new replacement windows and doors perform to their fullest potential and allow you to reap the full benefits of high performance features when they are installed properly. When placing your order for your new Traditions Windows and

Doors you can rest assured that you are dealing with a company with decades of experience in installing high performance products:

- Operate as professionals at the top of the industry
- Has an established track record of being reliable and customer focused
- Participated and completed quality and installation training given at the factory
- Is licensed, bonded and insured to perform your work
- Has decades of experience taking care of customers with a focus on customer satisfaction
- Has a consistently positive track record installing home products
- Performs each job with complete customer satisfaction as the number one goal

## Insulated for a Whole New Level of Comfort

Our sash and frame technology includes components that allow us to offer the very best in thermal performance and energy efficiency. By adding our optional high performing rigid insulation in the window's sash and frame, frost and condensation are virtually eliminated. And because our insulation is rigid we can assure you that there won't be any settling or voids that can occur with other insulating methods.

## Built Tight to Perform Right

In order to keep from losing energy through windows, every detail must be addressed in a way that supports tight construction of the overall window. No matter how many pieces and parts there are, each must be married together to create a perfectly fitted unit in order to ensure a highly efficient product. We believe that a window is only as good as the sum of its parts and with that in mind we created the perfect marriage of frame and sash designs to give homeowners a better option for getting the necessary return on their window replacement investment.

*Our frame system is fully fusion welded on both the mainframe and the sash for a precise and tight fit. Add the insulation, weatherstripping and the reinforcements in the meeting rail and you have a solid barrier to the heat, cold and heavy winds.*

# Exceptional Window Systems.

## Beat the Heat.

No need to spoil your view with unattractive plastic films. Keep your line of sight by selecting a window with glass that works for you. By blocking the heat from the outside when the sun is higher in the sky, your new Traditions Windows will keep the heat out and your air conditioned air inside – keeping your home cool, and more comfortable.

## Cool is Cool.

With so many shifts in the global climate, we all have to tend with the extremes of the changing seasons. Why worry about the cool nights and chilly temperatures? Choose windows that work to keep the heat inside and the cool air outside when you need it.

## Enjoy Peace and Quiet Again.

When you choose our insulated frame and triple glaze glass options – not only are you adding extreme thermal protection to your windows, but you also create a barrier between the peaceful and quiet indoors and the street noise from outdoors. When opting to upgrade the insulation package on your Traditions Windows not only will you drastically reduce unwanted noise from the outside but you'll get the added benefit of saving on your energy bills.

## Unix™ Glass – Engineered for the Extreme Heat.

Designed to function as a reflective thermos, Unix Glass system keeps the temperature in your home more comfortable and consistent. Say goodbye to out of control temperature swings and hello to the level of comfort you have been waiting for.

Our Unix Glass System is a dual glaze insulated glass unit made up of two panes of glass with 12 layers of high performance reflective shields, and the SustainaView Spacer System with high density Argon gas.

Our Unix Max Glass System is a triple glaze insulated glass unit made up of two panes of glass, and a third pane of sound absorbing glass, the SustainaView Spacer System, and Argon gas between the panes.

## It's Called Super for A Reason.

Traditions Windows feature a state of the art spacer system that we consider the cornerstone of our superior glass system. SustainaView™ by Super Spacer® is a dual seal Super Spacer system which results in our glass packages lasting up to five times longer than single seal units.

### Here's how it works...

*The all-foam formula of Super Spacer® blocks the heat path, so homes stay cool and comfortable inside.*

*Our dual seal system helps Super Spacer insulating glass units last up to five times longer in durability tests than single-seal units.*

*Our all-foam formula offsets the effects of temperature changes, barometric pressure, wind load and glazing pressure. The end result is less seal failure and fewer stress cracks.*

## Traditions' Unix Glass Offers You 12 Layers of Protection

With twelve layers of specially formulated coatings including three layers of silver, our Unix Glass rejects the sun's harsh heat without covering up your view.

With Traditions Double Hung Windows you can enjoy the beauty, charm and character of hand crafted windows, but without the maintenance. Take pleasure in the ease of operation, long-lasting design features and easy to clean features your new windows provide.

Indoor air quality is a concern for many who tend with allergies and other health concerns. By selecting Traditions Windows, you'll enjoy less condensation than windows with metal spacer systems. Less condensation means less opportunity for bacteria and mold growth, keeping your home's air cleaner.

# Double Hung Windows

## Features:

- DH performance rating DP35 with optional DP45 performance package.
- Dual Glaze using Unix double strength glass for maximum SHGC and UV protection – standard.
- All frame and sash corners are fusion welded at 45 degrees to eliminate air and water penetration.
- Full aluminum reinforced meeting rails for maximum strength.

### Additional Comfort Options:

- Optional insulated frame for maximum insulating value, 7.14 R-value per inch.
- Optional triple glaze.

### Choose Your New Window Performance Level

Double Hung Glass Package	Unix Max	Unix
U-Factor	0.23	0.29
Solar Heat Gain Coefficient	0.19	0.21
Air Infiltration - .09 cfm/ft2		
The lower the number, the better the insulating performance. Additional options could impact listed performance ratings.		

- Roller tilt constant force balance system for years of smooth and quiet operation.
- True slope sill to naturally drain rainwater away from the window.
- Two integral sash ventilation night latches allow safer enjoyment of a cool evening breeze.
- Both sashes tilt in for easy cleaning.
- TRU-Latch positive action locks that meet or exceed forced entry resistance requirements and hurricane impact testing.
- Extruded aluminum screen frame for long lasting durability and appearance.
- Our super clear, NatureVue Screen is standard on this window.

### Looking for a Matching Picture Window? Here is How Ours Measure Up.

Picture Window	Unix Max	Unix
U-Factor	0.23	0.28
Solar Heat Gain Coefficient	0.20	0.22

The lower the number, the better the insulating performance. Additional options could impact listed performance ratings.

Deluxe vent latches operate easily and safely - allowing you to let in a cool breeze securely.

Our low profile submarine tilt-latch offers you a streamlined view combined with an enhanced structural design.

No flimsy plastic pull tabs here. Our standard EZ Lift™ Screen handle is extruded into the actual screen frame making our screens stronger and so easy to manage.

This window features our innovative TRU-Latch system. This locking system is easy to operate and features a sensitive trigger mechanism designed to activate with very little force.

DP45 / 165mph

Traditions Single Hung Windows are an easy and affordable way to raise your standards. For a classically styled look add colonial grids to your new windows and upgrade your curb appeal. Our Single Hung Windows are a perfect fit for any style home from traditional to contemporary.

Inefficient windows are a drain on energy and resources. Our Spacer System actually blocks the path of the torrid summer heat, keeping your home cooler and more comfortable on the inside and keeping energy loss at bay.

DP45 / 165mph

## Features:

## With NatureVue Screens, You'll Enjoy Super Clear Views.

**NATUREVue**  
FROM NT WINDOW

Our NatureVue screens are so clear that they almost  
look invisible. This means that the NatureVue screen itself is  
not clearly visible in ones view from a distance. In fact, you'll find that you only notice the  
screen as you get close to it – a feature designed to ensure that your  
guests won't walk into the screen but clear enough to give you  
unobstructed, perfect views all the time.

NatureVue™  
Screen

Standard Fiberglass  
Screen

The NatureVue benefits don't stop there.  
Not only is the NatureVue screen system  
flame retardant, but it allows for more airflow  
and protects against pests more than  
traditional fiberglass screens.

NatureVue Screen

Typical Screen

NatureVue Screens feature  
Watershed Technology  
giving you a clearer view for  
the life of your screens.

This technology will repel  
water and resist dirt and grime,  
making them much less likely to  
accumulate on the screen unlike  
typical screens on the market.

## With NatureVue Screens You'll also Enjoy these Benefits:

- Excellent visibility from inside improves your view.
- Improved light transmittance.
- Better curb appeal when viewing windows from the street.
- Excellent insect protection due to 30% smaller openings than standard screens.
- Improved airflow as a result of increased openness.
- Watershed Technology gives you a clear view for the life of the product by repelling water and resisting dirt and grime, making them much less likely to accumulate on the screen.
